The figure shows the variation of c jet efficiency with jet p_T [GeV] for CMS data and simulation. The c tagger M is plotted with data points (closed circles) and simulation points (open circles). The SF_c values are indicated at specific p_T values.

- Data points are marked with filled circles.
- Simulation points are marked with open circles.

The x-axis represents Jet p_T [GeV] ranging from 20 to 200, and the y-axis represents the c jet efficiency ranging from 0.9 to 0.5. The CMS label is present in the upper right corner with the text "35.9 fb^{-1} (13 TeV, 2016)".
