The graph shows the cross-section \( \sigma(u_T) \) in GeV as a function of \( Z/\gamma q_T \) in GeV.

- **Z → µµ** represented by blue circles.
- **Z → ee** represented by red open circles.
- **γ+jets** represented by green squares.

The data points are overlaid with uncertainties, and the ratio of Data/MC is shown. The graph includes a CMS label and a note indicating 19.7 fb\(^{-1}\) (8 TeV).
