

| Systematic uncertainty              | Magnitude (%) |
|-------------------------------------|---------------|
| Track reconstruction                | 6–21          |
| Vertex reconstruction               | 9–20          |
| ML tagging                          | 0–3           |
| $\vec{p}_T^{\text{miss}}$ selection | 5–7           |
| PDF uncertainty                     | 1-14          |
| Trigger efficiency                  | 1–2           |
| Pileup                              | 3–6           |
| Integrated luminosity               | 1–3           |
| ECAL prefiring                      | 0–1           |
| Overall                             | 17–22         |
